BEYOND MISSION CAPABLE SOLUTIONS LLC

Founded in 2013, Beyond Mission Capable Solutions (BMCS) LLC is a best-in-class cybersecurity consulting and applied research company. We are known as the go-to cybersecurity innovators and trusted advisors for our federal and industry partners. Our cybersecurity solutions have successfully been applied at some of the Department of Defense's most mission-critical programs and systems. At BMCS, cybersecurity is what we do!

CORE COMPETENCIES

BMCS offers best-in-class cybersecurity subject matter expertise, engineering, and consulting.

- **System Security Engineering (SSE)**
- **Program Protection Planning (PPP)**
- **Risk & Authorization Management (RMF Implementation, cATO, Agile Authorizations)**
- **Cyber Test & Evaluation (Purple Team/PenTest)**

Small Business
CAGE: 6XGH3
NAICS:

54151HACS - Highly Adaptive Cybersecurity Services
541511 - Custom Computer Programming Service
5415S - IT Professional Services

SUCCESS STORIES

SECURITY INNOVATORS:

- Creators of the Air Force's Rapid Cyber and C2 Security Assessment & Authorization Program.
- Pioneers of the first Continuous and Fast Track Authorization processes within AF Weapon Systems and Rapid Cyber systems.
- Author of new software authorization processes for third-party tools migrating to secured DoD environments; adopted by programs such as the AF's Digital Engineering Platform as a Service (DPaaS) as standard operating procedures.
- Designed and codified new software security guardrails for software-only authorizations within the DoD software development lifecycle; our security guardrails were recognized as a new security best practice by the DoD's RMF Working Group.

TRUSTED ADVISORS:

- Security advisors and blue team assessors for Cloud One, the preeminent Air Force cloud and platform service solution provider.
- Performed trusted roles (SCA-R, AODR, Purple Team) for the AF Enterprise IT as a Service as it outsourced critical network components.
- Created cybersecurity strategy to integrate industry and DoD security best practices into the AF Armaments Cybersecurity portfolio.
- Designed cyber policy, integrated cybersecurity engineering, and conducted continuous risk assessments for critical Air and Space Force software factories such as LevelUP, Kessel Run, and Kobayashi Maru.

OUR CUSTOMERS :

U.S. AIR FORCE | UNITED STATES SPACE FORCE | DEFENSE TECHNICAL INFORMATION CENTER | F-35 LIGHTNING II | EITaaS | CLOUD ONE | KESSEL RUN
